Agency Overview

About Us

Today, people are taking control of the conversation in an entirely new way. Engaging with your advocates and influencers in a human aspect and allowing for them to feel part of the community is more important than ever.

At Dublite Productions, we understand that engaging with your advocates and influencers through the conversations that they care about will push your brand to new heights. This means that winning in the hearts of the consumer demands content that pushes the limits, is provocative, starts a conversation and is completely irresistible.

We are an agency built of creatives and strategist that are passionate and committed to telling your story in a new and exciting way. Most importantly, we believe if you bring the right elements and people together, amazing things will happen.

EMBARK

We kick off your projects with a meeting to outline and define your needs, your brand and any constraints. We have found that the success of a project is directly correlated to our team fully understanding the goals that we are striving to achieve and producing the best solution.

DISCOVERY SESSION

Our teams meet in a closed-door conference room environment where we are able to brainstorm, understand, digest and download all pertinent knowledge for a given project. The discovery session will allow us to have a master understanding and a detailed direction for the variables within the project. From the discovery session we will develop an action plan that allows us to produce the most compelling and unique story.

PRODUCTION

Once our guide has been approved we move full force into the production of your unique story. This is where your project begins to come to life.

By far the most important step in our process for producing a compelling and unique story is the Pre-Production. We take all the knowledge, materials and information gained from the discovery session and we custom tailor a unique and compelling script or outline that is used as a guide in the production of the story.

PRE PRODUCTION

POST PRODUCTION

Post Production is an exciting time. We take all the moving elements within your project and bring them to life. Your project becomes a finely tuned, unique and compelling piece of content that is now ready to be shared with your advocates and influencers.

DISTRIBUTION

Distribution is the final stage of our process and as important as all the steps leading up to it. This is where we deliver the final product to be used on the various platforms discussed in the first introduction meeting.

Amway Dashboard Video

Videographic Story Telling

We worked with Amway Durables R&D to develop the Dashboard video that tells the story of how Durables R&D is using the Dashboard to monitor its supply chain at the granular level to identify anomalies and provide corrective action before the products reaches the customers hands. The purpose of this video was to document Durables R&D's Dashboard system and how it is being used to improve the Amway brand reputation. This message will be conveyed to Amway leadership, global employees, Board of Directors and IBO's.

Amway Dashboard

Photographic Story Telling

We oversaw the entire creative development of the Amway Durables R&D Dashboard storyboard that depicts the Dashboard's purpose within R&D. To depict the story of the Dashboard we produced photographic images, copy and tied them together with graphic design.

Amway Service Collaboration Video

Videographic Story Telling

We worked with Amway Durables R&D to develop a Service Collaboration video that tells the story of Service Collaboration and how Durables R&D is using Service Collaborations as a way to develop new technologies for use in the field, improve the customer experience and cost savings within service. The purpose of this video was to document Durables R&D Service Collaborations and how they are being used to improve the Amway brand reputation and to convey this message to Amway leadership, global employees, Board of Directors and IBO's.

Amway Service Collaboration

Photographic Story Telling

We oversaw the entire creative development of the Amway Durables R&D Service Collaboration storyboard that depicts how Durables R&D is using service collaborations to innovate and improve the customer experience when an eSpring or Atmosphere unit comes in for repair. To depict the story of Service Collaborations we produced photographic images, copy and tied them together with graphic design.

Amway Transfer of Knowledge Video

Videographic Story Telling

We worked with Amway Durables R&D to tell the story of how Durables R&D is transferring their manufacturing and product knowledge to their Asian counterparts to insure quality and reliability will stay the same with the movement of manufacturing lines closer to the consumer. The purpose of this video was to document Durables R&D's story of the Transfer of Knowledge and convey it to Amway leadership, global employees, Board of Directors and IBO's.

Amway Transfer of Knowledge

Photographic Story Telling

We oversaw the entire creative development of the Amway Durables R&D Transfer of Knowledge storyboard that depicts how Durables R&D is collaborating with its counterparts to maintain quality and reliability in the manufacturing of the Atmosphere and eSpring units within Asia. To depict the story of the Transfer of Knowledge we produced photographic images, copy and tied them together with graphic design.

GPM Pump and Truck

Trade Show / Photographic Brand Development

We worked in collaboration with GPM Pump and Truck to design and develop their presence at the 2013 Pumper Show in Indianapolis, IN through the use of a trade show booth that highlighted their products. We also provided photographic representation of their flagship truck as well as developed Ad's within pumper magazine leading up to the Pumper Show.

NEW UNITS IMMEDIATELY AVAILABLE!
CALL US AT
(708) 288-8111
TO LEARN MORE.

FEBRUARY 25TH - 28TH 2013

INDIANAPOLIS, INDIANA

THE 2013 PUMPER SHOW IS ALMOST HERE!

Visit GPM Pump and Truck Parts at booth #2100 and see the Sewer Duck™ – the industry's ONLY completely OEM supported jetter solution.

This exclusive, high-performance jetter is the result of over 25 years of industry research and experience. It's built to exceed even the most demanding expectations, offering:

- Standard Perkins engine with Cummins engine options available, including CNG
- Manufactured parts available for purchase separately
- Easy transfer from one chassis to another
- Multiple cold weather options
- Myers 880-25 & D65-20 pumps

Special Features

- No OEM interface
- 1,000 and 3,000 gallon units available
- Stainless steel tanks – plastic optional
- Rear engine keeps unit self-contained – separating the chassis from the jetter and reducing fuel costs
- Hydraulically operated rotating hose reel with mounted throttle control and 800 foot hose reel

WE ARE PROUD SPONSORS OF BOB BODE'S NHRA FUNNY CAR

Visit us at booth #2100 and enter your card to win a Sewer Duck racing helmet signed by driver Bob Bode!

1404 West Fullerton Avenue - Addison, IL 60101-4322 • OFFICE 630-543-7373 FAX 630-543-6851 • www.gpmpumptruckparts.com

Brand Development

We worked in collaboration with the GVW Parts marketing team to design and develop custom sales brochures to showcase GVW Parts suppliers and their current sales offerings through GVW Parts.

Map of Alaska showing locations of Alaska Airlines flights. The map includes Anchorage, Fairbanks, Juneau, Ketchikan, Kodiak, Sitka, and Wrangell. Alaska Airlines is highlighted in red.

A Special One-Time Offer 5% Discount for Quantity Order

GWV and Stemco are partnering to offer a special promotion to the top boat and parts retailers in each product line. For a limited time, this promotion will allow our affiliated business partners to place inventory on a one time basis. GWV business partners have the ability to place one pre-purchased order per ship to location with a 5% discount on a qualifying order (minimum of 240 seals, max of 960) in quantities of 12 or placed up to 4 orders. Maximum of 240 seals not to exceed the 960 seal limit. Application part numbers are listed in the table below.

QUALITY PARTS AT A FAIR PRICE

That's Our Standard

AFTERMARKET REPLACEMENT PARTS
GVW offers a full line of trusted aftermarket replacement parts that offer the same quality as our other lines. These parts are made with the highest quality standards but cost much less than their OEM counterparts. We back them up with the same warranties as everything else we sell because we believe in them, and the value they provide.

Headquartered in the Chicago area, GVW Parts Distribution, LLC is a leading provider of quality truck and trailer parts for the heavy-duty trucking industry. With millions of dollars in inventory and over 50,000 sq. ft. of warehouse space between Naperville, Illinois, and Chicago, Illinois, GVW Parts Distribution, LLC offers customers a complete line of parts from the leading manufacturers, and provides local parts to make your business a success. GVW Parts

Brand Development

We worked in collaboration with the GVW Parts marketing team to design and develop a generic aftermarket parts catalog that could be custom tailored for GVW Parts distributors to resell GVW Parts aftermarket parts to their customers.

GVW Parts

Brand Development

We worked in collaboration with the GVW Parts marketing team to design and develop a monthly initiatives brochure that was tailored to the current offerings, new vendors and promotions through GVW Parts for that month. The MIB was widely used by the national sales team to facilitate in new business development as well as promoting sales within current GVW Parts customers.

The collage displays 12 monthly initiatives brochures from GVW Parts, arranged in a grid. Each brochure is tailored to a specific month and features a unique design and color scheme. The brochures include sections for 'NEW OFFERING', 'NEW VENDOR', 'PRODUCT OFFERING', 'MONTHLY INITIATIVES', and 'YOUR LINK TO VALUE'. The products featured include light duty rotating electrical, remanufactured parts, HVAC parts, air valves and compressors, wheel end products, and more. The brochures are arranged in a grid, with some overlapping, showing the progression of the monthly initiatives over time.

March 2013: Features 'ULTRACAPACITOR Engine Start Module' by PANAPACIFIC, 'VALUE U JOINTS FROM A NAME YOU TRUST' by SVL, and 'MONTHLY INITIATIVES - MARCH 2013'.

April 2013: Features 'LIGHT DUTY ROTATING ELECTRICAL' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - APRIL 2013'.

May 2013: Features 'WONROE' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - MAY 2013'.

June 2013: Features 'Seal Promotion' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - JUNE 2013'.

July 2013: Features 'Seal Promotion' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - JULY 2013'.

August 2013: Features 'Seal Promotion' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - AUGUST 2013'.

September 2013: Features 'Seal Promotion' by MASCO, 'REMANUFACTURED PARTS' by MASCO, and 'MONTHLY INITIATIVES - SEPTEMBER 2013'.

GVW Parts

Brand Development

We worked in collaboration with the GVW Parts marketing team to design and develop custom sales tools for the national sales team to use while on the road working with current and new customers. We helped develop a new customer enrollment folder, a donut box, private label slick, prospecting brochure and a Dnet select brochure.

ICCNexergy Intelligent Power Solutions

Photographic Brand Development

We developed photographic images to be used for ICCNexergy's website and brochures to promote their current line of intelligent power solutions.

GVW Parts

Brand Development

We worked in collaboration with the JIT Truck Parts marketing team to design and develop several sales tools to be used by their national sales team. These sales tools included a line card, distribution network card, a Meritor sales sheet, a Stemco Kaiser sales sheet and a value proposition presentation.

Sloan Transportation Products

Photographic Brand Development

We developed photographic images to be used for Sloan Transportation's brochure and website banner to promote their new line of environmentally friendly cleaning product, MAXXClean Super Concentrate Cleaner.

Sloan MAXXClean

SUPER CONCENTRATE CLEANER

PEOPLE SAFE

ENVIRONMENT SAFE

MAXXClean Super Concentrate Cleaner

Conventional cleaning products, often rely on ingredients that are potentially hazardous for people and the environment. Highly alkaline chemistry is corrosive; common solvents can be absorbed through the skin with potential effects on the liver, kidneys, lymph and blood systems; and certain terpenes present both human health and environmental concerns.

MAXXClean Super Concentrate has been formulated in partnership with the U.S. Environmental Protection Agency to provide a safer, more environmentally preferable alternative to existing cleaning products without sacrificing performance. MAXXClean packs the punch you need to tackle the most demanding jobs and loosen grime on contact for quick and easy clean up.

This highly concentrated, versatile cleaner is formulated to take on a wide range of cleaning jobs. It is able to quickly power off even stubborn soils and greases from any surface not harmed by water.

MAXXClean Super Concentrate is available in 5oz. and 15oz. ready-to-use pouches to be made into Super Degreaser, Vehicle Wash or Window & Glass Cleaner.

Benefits

CLEANING POWER. In tests with comparable products containing potentially damaging chemical formulations, MAXXClean proved to clean as well or better than competitive products.

ENVIRONMENTAL COMPLIANCE. MAXXClean was designed in partnership with the EPA. From formulation to packaging, it's made to comply with the new environmental standards.

EMPLOYEE SAFETY. MAXXClean is safer to use than conventional cleaners. It doesn't contain butoxyethanol, citrus solvents or any caustic ingredients.

VERSATILITY. MAXXClean comes in two convenient concentrates and three applications to accommodate a variety of the most common cleaning purposes.

CONSISTENT CLEANING RESULTS. Pre-measured containers promote accurate and consistent results, eliminating wasteful or potentially damaging over-use.

Recommended Uses

- Degreasing & heavy duty cleaning
- Machine Cleaning
- Truck wash
- Class and interior cleaning
- Chrome and stainless steel cleaning
- General shop, bathroom and kitchen cleaning

MAXXClean Super Concentrate

Available in 5 oz. and 15 oz. ready to use pouches.

MAXXClean Super Degreaser

Available in one quart and one gallon containers.

MAXXClean Vehicle Wash

Available in one gallon and five gallon dispenser containers.

MAXXClean Window & Glass Cleaner

Available in one quart and one gallon dispenser containers.

Sloan Transportation Products

Photographic Brand Development

We developed photographic images to be used for Sloan Transportation's promotion of their new MAXXDuty pogo stick. Our Photographs were used in both a press release and sales sheet.

Sloan Transportation Products Ltd.
INTRODUCES THE NEW MAXXDUTY POGO STICK
Innovative Design Redefines the Category as the Industry's First Composite, All-in-One Solution

FOR IMMEDIATE RELEASE
HOLLAND, MI - MAY 7, 2012

The MAXXDuty pogo is the product of a lengthy development process, which included several iterations exposed to extensive cycle testing and over a year of field trials in the harshest conditions. Its patented design features an extremely durable, injection molded, glass-filled nylon polymer top and base, and it allows for several attachment options. The rod is made in the USA of rigid, pultruded fiberglass. All of the composite, nylon, and fiberglass components are UV resistant, and any internal metal pieces are encapsulated in a protective casing. The mounting bolt, nut, and washer are the only exposed metal components on the pogo, and they are zinc-plated for corrosion resistance.

"We're very excited about this new design, and we believe our customers will be too. It demonstrates our continued commitment to finding opportunities in the industry to innovate and create products that offer new levels of quality, efficiency, and value."

Thomas Brown
President

The MAXXDuty pogo is available in a 40-inch length and is ideally suited for Sloan's MAXXDuty 3-in-1 and 4-in-1 wraps designed to efficiently manage air, electrical, and hydraulic lines, but it can be used with any heavy-duty line and cable configurations.

The new MAXXDuty pogo stick and the complete line of Sloan products can be found at: www.sloansystems.com.

Please click on any of the images above to download.

MAXXDuty Pogo Stick

The new Sloan MAXXDuty pogo stick is redefining the category as the new benchmark for strength, durability and ease of installation.

- The industry's first pogo made of composite materials
- Proven to outperform competitive products
- Integrated hoop eliminates the need for zip ties
- The ONLY all-in-one solution available in the marketplace
- Ideally suited for Sloan's MAXXDuty 3-in-1 and 4-in-1 wraps

PART #451126

Traditional pogos rely on an internal spring to provide tension and flexibility. Over time, the spring begins to weaken and the pogo shows signs of wear, on average, this happens at approximately 50,000 cycles.

The rod on the Sloan MAXXDuty pogo is made of fiberglass and eliminates the need for an internal spring. It has undergone extensive testing over a half million cycles without signs of failure and over a year of field trials in the harshest conditions with no signs of wear – that's 10 times longer than traditional pogos. Add to that the nylon polymer all-in-one hoop that allows for total flexibility in managing critical air, electrical and hydraulic lines, and it's easy to see why the Sloan MAXXDuty pogo is the new industry standard.

Comparison Chart

PRODUCT	Cycle Count
Competitor 1	~10,000
Competitor 2	~20,000
MAXXDuty	~1,000,000

Cycle Comparison

In rigorous cycle testing against competitive products, the Sloan MAXXDuty pogo has proven to outlast traditional spring-supported pogos by as much as 10 times in the harshest conditions with no signs of wear. In testing where traditional pogos wear and fail at 100,000 cycles or less, the innovative design of the MAXXDuty pogo has exceeded that a million cycles under the same conditions without failure.

MAXXDuty Pogo Stick

Product Features

- Patented design features an extremely durable, injection molded, glass-filled nylon polymer top and base
- Allows for several attachment options
- Can be used with any heavy-duty line and cable configurations
- Rod is made in the USA of rigid, pultruded fiberglass
- All composite, nylon and fiberglass components are UV resistant
- Internal metal pieces are encapsulated in a protective casing
- Mounting bolt, nut and washer are zinc-plated for corrosion resistance
